

GLOBEX OPERATIONS HANDBOOK - SAMPLE DOCUMENT (fictional, for testing)

1. Company Overview

Globex is a logistics company founded in 2012. Its headquarters are located in Rotterdam, the Netherlands. The company employs 4,200 people and operates freight and warehousing services across Europe. Globex's core business is just-in-time delivery for industrial clients.

2. Fleet and Network

Globex operates a fleet of 320 trucks. The network contains 14 distribution centers across eight European countries. Average on-time delivery is 96 percent. Each distribution center is connected to at least two major motorways. Trucks are tracked with GPS and drivers use an internal routing application.

3. Warehouse Safety

All warehouse staff must wear PPE: hard hats, steel-toe boots, and high-visibility vests. Forklift operators must hold a valid certification. A safety drill is held every month. Spills must be reported to the shift supervisor immediately. Visitors receive a short safety briefing before entering the floor.

4. Sustainability

Globex targets 40 percent of its fleet to be electric by 2030. Distribution centers run partly on solar panels. The company also measures emissions per shipment. Internal audits review progress every quarter and publish the results annually.

5. Customer Service Standards

The customer service team replies within 24 hours to every request. Claim resolution rate is 99.2 percent, with claims closed within 14 days. High-priority shipments get real-time tracking updates. Customers can reach support by phone, email, or a web portal.

6. Hiring and Training

Globex runs two hiring intakes per year. Referral bonus is 1,500 EUR. New drivers complete a six-week training program. Warehouse trainees shadow a mentor for the first month. Performance reviews happen twice a year.
